

# HOSHIZAKI ICE MACHINES

## Storage Bins

In order to ensure ample quantities of ice at all times, Hoshizaki offers a wide range of storage bins that configure perfectly with Hoshizaki Ice Machines.

The stainless steel exterior provides for easy cleaning and a long lasting attractive appearance.

Sturdy construction for side by side or stacked installations and non-corrosive bin liner provide safe, sanitary storage of cubed or flaked ice. Foamed in place insulation in all bin walls provides dependable, low melt rate ice storage. The new baffle design increases ice accessibility by 30%. HoshiGuard Antimicrobial Agent adds extra protection to the storage bin and ice scoop.

The size of the bins depends on several factors – the capacity of the machine, the average daily demand and the peak demand.

Some ice machine bin combinations may require a top kit. Please check the table attached for possible configurations with the appropriate top kit.
